

Aircraft Business

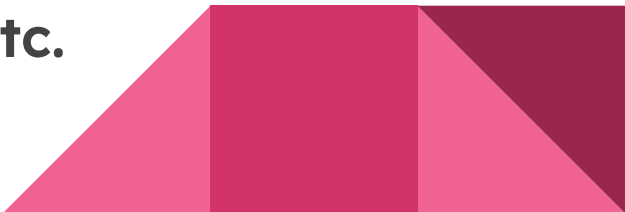

Presentation

Overview

Business recommendations for an aircraft company seeking to add more airplanes to its portfolio based on information about aircraft accidents.

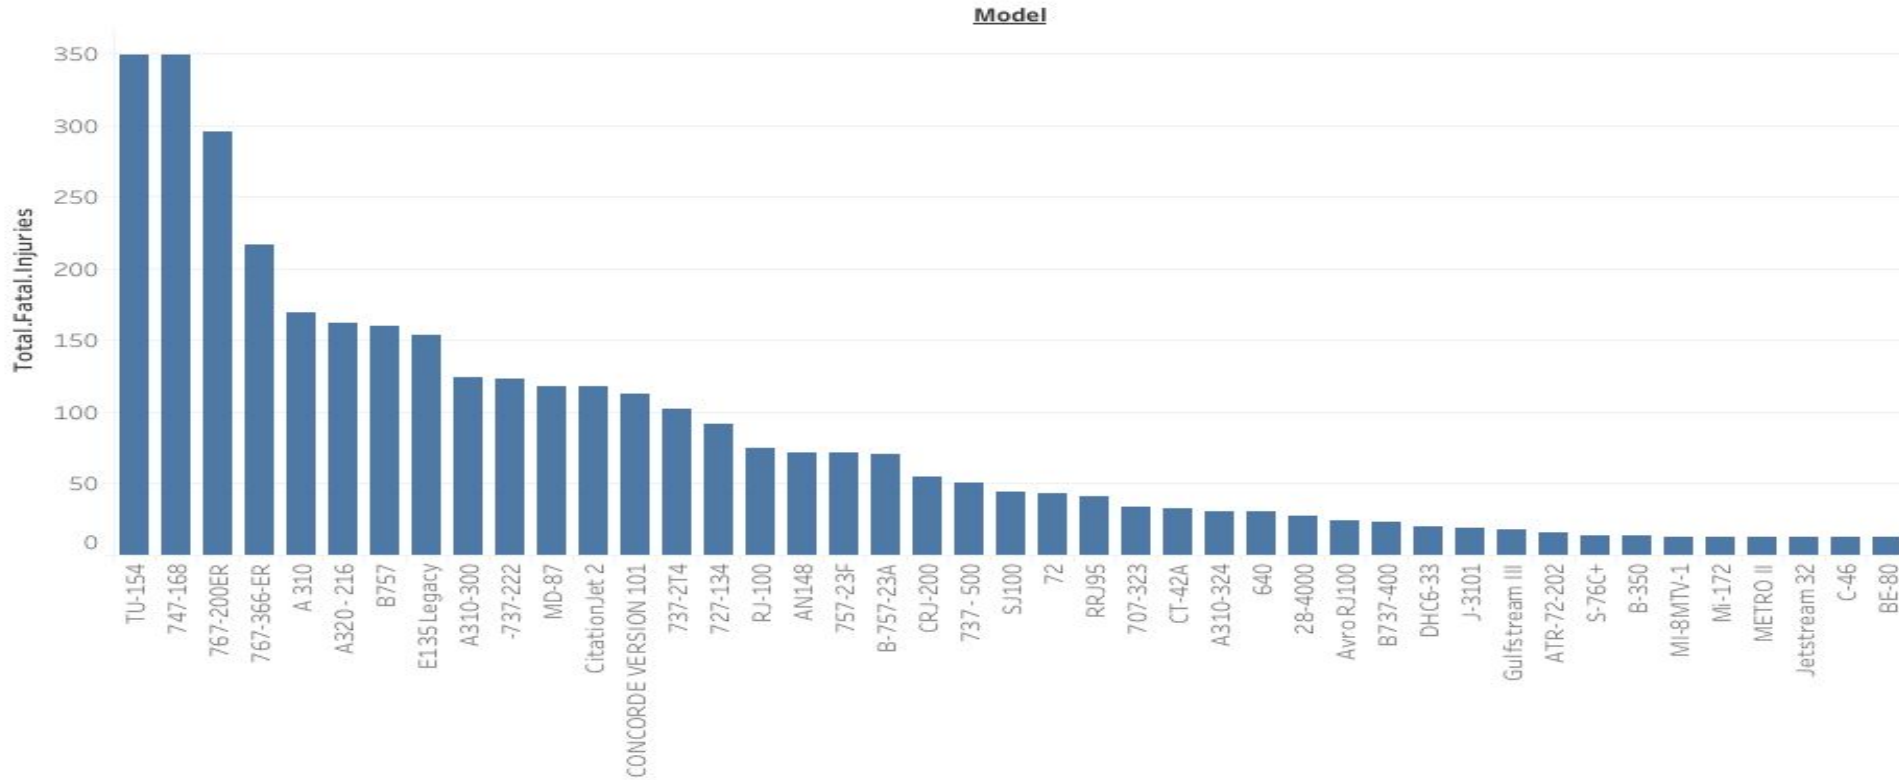

Data Understanding

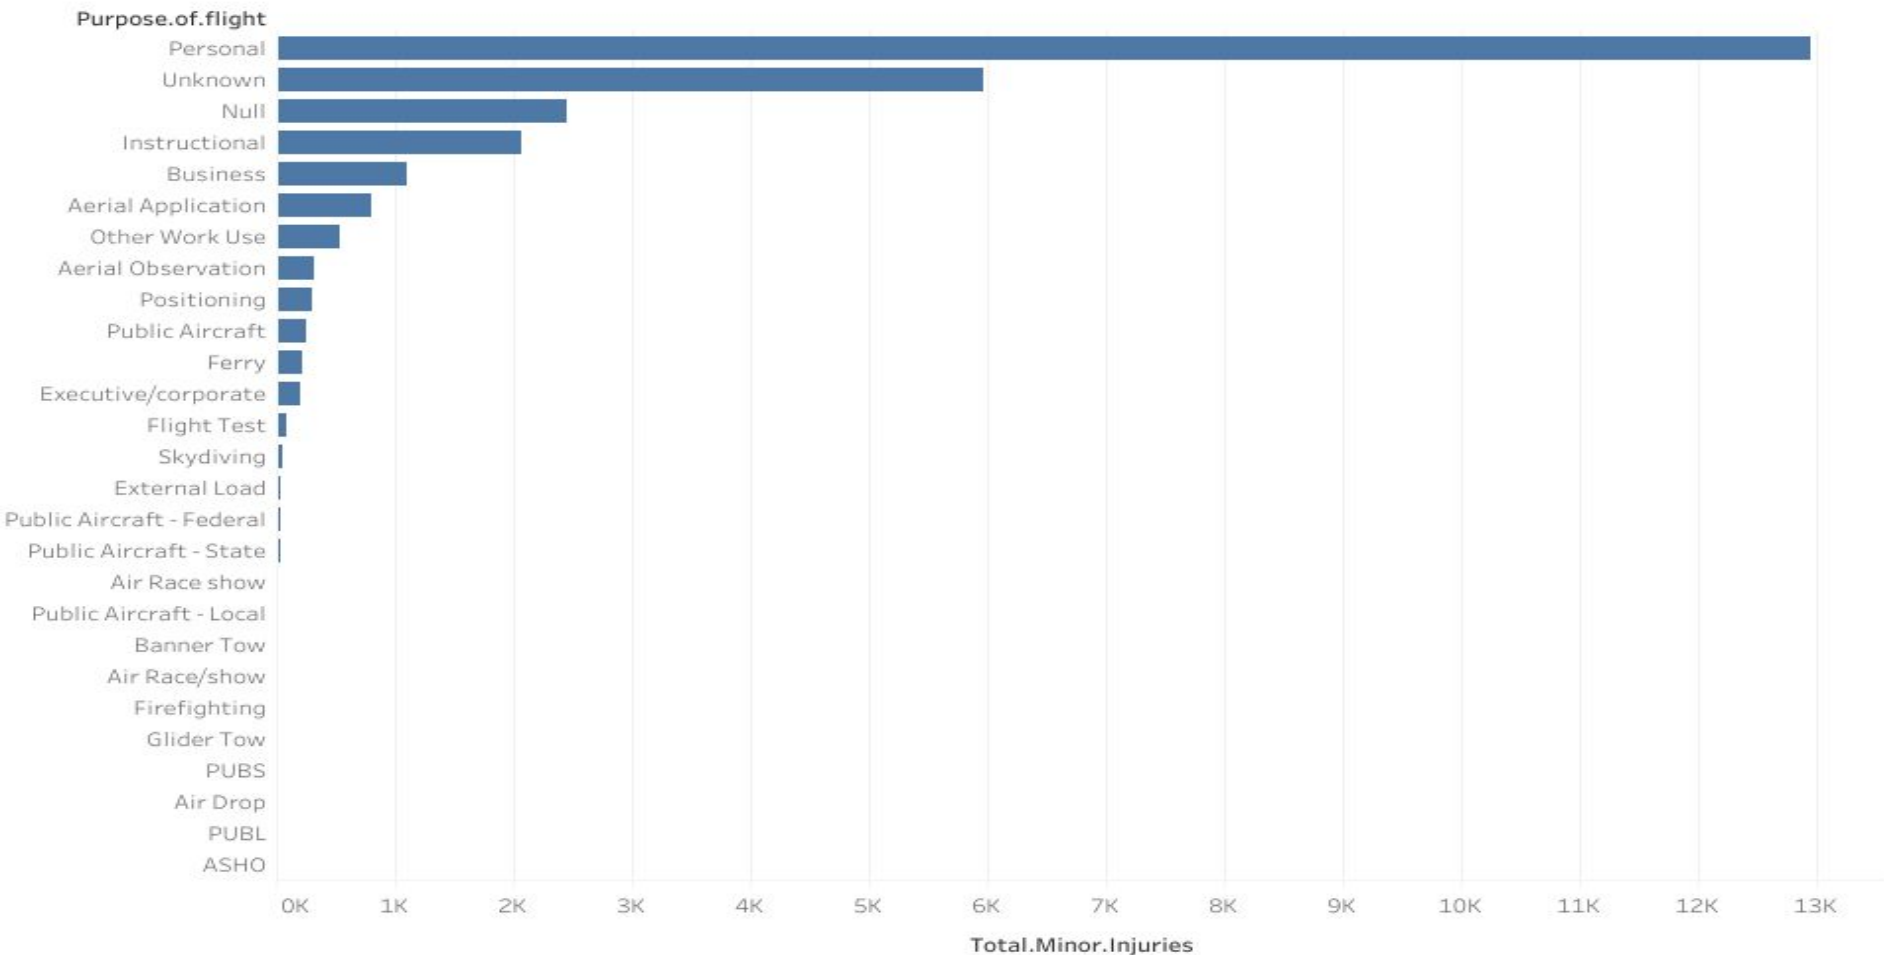

- Accidents took place from 1948 to 1942
 - Happened in countries all over the world but mainly in USA.
 - There were serious and fatal injuries.
 - Some passengers were uninjured
 - Airplane damage also occurred
 - Flights were of various purposes including Business/Corporate, Military, Personal etc.
-

Total Fatal Injuries amongst Aircraft Models

Minor Injuries in Various Flights

Serious Injuries across Countries

Recommendations

- **Avoid flights in USA as many accidents have occurred there.(Potential loss)**
- **Personal flights are risky,hence carried out with caution.(Possible loss)**
- **Purchase of aircraft (Mcdonell Douglas MD-11) will be advantageous to the company.**

Mcdonell Douglas MD-11

- Zero Fatal Injuries
- Zero Serious Injuries
- Zero Minor Injuries
- Minor aircraft damage after accident(low losses incurred)
- High level of passenger safety

McDonnell Douglas MD-11
